A E PORTER

The publication of decennial census reports was initiated by the British Government during the middle of the nineteenth century and has been continued after independence. Questions of reliability and bias in the compilation of information as well as motivations which informed the publication of these reports have been raised and are relevant to every user of census reports. Even so, the censuses were often conducted with painstaking efforts and have preserved for us extremely wide-ranging information on the social, economic and political aspects of Indian life.

They contain information on the distribution and age structure of the population; castes and communities, patterns of occupation, patterns of land-holding and tenancy, health, migration, language, and education, etc., to name just a few aspects of the panorama of Indian society. For researchers interested in understanding Indian life, the reports of the decennial censes compiled by British officers remain, despite the problems of bias, misunderstanding or conscious distortion, an invaluable source of information.

The census reports consisted of two parts: a general social and economic profile and statistical material. The general profile contains an account of the census operations, the geographical and physical features of the area, the ethnography of caste and communities and changes in age-structure, health, education, employment, landholding pattern and tenancy, etc. The statistical part contains data on geography, rainfall, temprature, distribution of

IMPERIAL TABLE I.—Area, houses and population.

This table corresponds to imperial table I of 1921 and shows for divisions, districts, cities and states the area, the number of houses and inhabited rural *mauzas*, and a distribution of occupied houses and population between urban and rural areas. Similar details for subdivisions and police-stations are shown in provincial table I.

2. The areas given differ in some cases from those given in the corresponding table of 1921. They are based on the figures supplied by the Government of Bengal for the area of police stations, and such explanations of difference as are forthcoming are given in detail in the title page to provincial table I. They exclude large rivers and arms of the sea, the inclusion of which would have affected the calculation of the density of population (number of persons per square mile), but include reserved forest areas and the Sundarbans. The province gained during the decade an area of 30 square miles as a net result of transfers between Bengal and Bihar and Orissa, the details of which are given below :

District of Bengal.	Area gained by transfer		Area lost by transfer		Total net gain to Bengal.	
	From district of Bihar and Orissa.	Area (square miles).	To district of Bihar and Orissa	Area (square miles).

Malda ..	Santal Parganas ..	31	Purnea ..	1	Malda ..	30

Details of the population at each census in the areas affected by these inter-provincial transfers are given in the title page to imperial table II.

3. Detailed particulars of the areas treated as towns and of the variation in their numbers since 1921 are given in imperial tables IV and V with their title pages. For the reasons given in the title page to imperial table III the *mauza* has been substituted as the rural unit in place of the village used in other parts of India. A "house" is defined for census purposes as the buildings, one or many, inhabited by one family, i.e., by persons living and eating together in one mess with their resident dependents. It therefore differs from the homestead enclosure which may contain more than one census "house". It also includes boats and other vessels used as dwelling places.

IMPERIAL TABLE II.—Variation in population since 1872.

This table, corresponding to imperial table II of 1921, shows a comparison of the population recorded in 1931 with that for the same areas at previous enumerations.

2. Differences between the figures now given and those shown in the census reports for previous enumerations are due to inter-provincial and inter-district changes of jurisdiction. Adjustments on account of such transfers between 1872 and 1921 are incorporated in the figures given in the table of 1921. For the areas transferred during 1921-1931 from the jurisdiction of one province to another or of one district to another the population has been ascertained or estimated for previous enumerations and further modifications made accordingly.

3. Inter-provincial transfers occurred in 1921-1931 only between Bengal and Bihar and Orissa and resulted in a net gain to Bengal of 6,771 persons (3,341 males and 3,430 females). Details are given below of these figures and of the consequent adjustment made in the figures shown in the table of 1921 for previous enumerations :

IMPERIAL TABLE III.—Towns and villages classified by population.

This table corresponds to imperial table III of 1921 and shows the number and population of inhabited localities classified according to the size of their population. In the heading of the table the word " villages " has been used with reference to the rural population in order to make it consistent with the heading used for this table elsewhere in India. In most parts of Bengal, however, the rural population does not live in villages like those of other provinces of India and as on previous occasions the unit actually taken is the *mauza*, a division for administrative purposes which has now been made in all British Districts as well as in Cooch Behar. The *mauza* is in general well understood by the people and the word has the sanction of common usage. The residential portion of the *mauza* most nearly approximates to a village in the ordinary sense in the Chittagong Hill Tracts. The figures given for " mauzas " in the Tripura State must be understood as referring to residential villages.

2. Only such localities have been treated as " towns " for this table as are so treated in imperial tables IV and V and on the title pages to these two tables are given details of the areas concerned and the variations in their numbers since 1921. Separate figures of the towns and inhabited rural *mauzas* combined together in column 2 of this table are given in columns 3 and 4 of provincial table I. The number of inhabited rural *mauzas* of each class given in the table can be separately calculated by subtracting from the figures in columns 4, 6, 8, etc., of this table the total number of towns of the same class given under the same area in imperial table V.

IMPERIAL TABLE IV.—Population of towns with variations from 1872 to 1931 by sexes.

This table corresponds to imperial table IV of 1921. The urban population shown in imperial table V by districts according to religion and sex is here shown by the size of town in which it lives according to sex. Towns are shown in six classes: I—those with a population of 100,000 or over; II—those with a population of 50,000 to 100,000; III—those with a population of 20,000 to 50,000; IV—those with a population of 10,000 to 20,000; V—those with a population of 5,000 to 10,000; and VI—those with a population of less than 5,000. Variations of population from 1872 to 1931 are shown for each locality since its treatment as a town in the census reports and also for the total of the six classes.

2. Figures are given for 143 towns of which 123 are municipalities and are not distinguished in the table. Of the 20 towns which are not municipalities those which are cantonments are marked with a dagger (†) and the remainder with an asterisk (*). The corresponding table of 1921 showed figures for 135 towns. Of these three (Bolpur in Birbhum district, Buxa in Jalpaiguri district and Gopalganj in Faridpur district) not being municipalities are no longer counted as towns owing to their small population in 1921 and the subsequent abolition of the cantonment of Buxa and three (Maniktola, Cossipore-Chitpur and Garden Reach in the 24-Parganas) have since been included within the Calcutta municipal area. Figures are shown for eleven new census towns distributed by class as follows: Class IV—*Kulti (Burdwan) and *Feni (Noakhali); Class V—*Kalimpong (Darjeeling), Gauripur (Mymensingh), *Siliguri (Darjeeling), *Burnpur (Burdwan), Dum-Dum (24-Parganas) and *Contai (Midnapore); Class VI—*Lalmonirhat (Rangpur), *Ondal (Burdwan) and *Naugaon (Rajshahi). Of these eleven new towns Dum-Dum and Cauripur are municipalities. In addition Barrackpore, Jalapahar and Lebong, the only three cantonments now existing in Bengal, are shown as separate towns and not included, as previously, in the adjacent municipalities. For comparison with the figures in previous reports, therefore, cantonment figures should be added to those shown in this table for the adjacent municipalities and the figures for Dum-Dum, now a municipality itself, to those for North Dum-Dum.

3. For towns newly added to the list at any census, figures for previous enumerations are not given in the table. The class totals given in previous reports have been preserved so that they do not agree with the sum of the entries below them owing to (a) the movement of towns between the classes due to changes in their population, (b) the retention in class totals of figures recorded at previous enumerations for towns since omitted and (c) changes in the grouping of localities shown in some years as separate towns but in others combined together. The class totals therefore represent for each census year the total number of persons then living in towns of that class and not the total of persons then living in the towns now forming that class. Details of the difference between the class totals and the sum of entries below them in the table can be collected from the supplement printed after the table. In this is given under the appropriate class the population recorded at each census for localities not treated as towns at every enumeration or falling in different years in different classes. The class total shown for any year therefore corresponds to the result obtained by subtracting from the total of the towns under it in the table the population of those towns for which figures appear in the supplement but under some other class and by adding to this difference the total of localities appearing as towns in the year concerned in that class in the supplement but not in the table. Two statements below show the population with its variations from census to census of localities continuously treated as towns between any two census years: figures in bold type are those actually recorded at the census of the year concerned.

The population in 1931 of localities treated as towns in 1921 is 3,659,317 (males 2,284,731, females 1,374,586) showing an increase of 448,013 (males 293,192, females 154,821).

4. Figures of previous enumerations have been adjusted so as to give the population of the areas now constituting respectively Calcutta, Howrah and Dacca cities, the Suburbs of Calcutta in 24-Parganas and Agartala. With these exceptions no adjustment of figures in previous reports has been made for changes of area, but footnotes have been added to the table where a new municipality has been formed or partly formed from one already existing.

5. During the decade 1921-1931 slight changes of area, the nature and extent of which are not specified, are reported for Baranagar, South Dum-Dum, Baduria, Santipur, Krishnagar, Old Malda and Bansberia. Changes of which also the area is not given occurred in Chittagong by the addition of Gosaildanga village, in Pirojpur by the exclusion in 1924 of 8 out of the 25 villages constituting the municipality, in Rajbari by the exclusion of rural portions, in Kurigaon owing to erosion by the river Dharala and in Kishoreganj by an unspecified decrease. IMPERIAL TABLE V.—Population of towns by district, religion and sex.

This table corresponds to imperial table V of 1921. The urban population shown in imperial table IV according to a distribution by the size of the towns in which it lives is here shown by religion and sex distributed according to districts. The districts are shown in the same order as throughout the tables. Towns are arranged within districts in the order of the subdivisions and police-stations in which they lie as given in the Civil List and within police-stations in the order of their size.

2. The table contains figures for 143 towns of which 123 are municipalities and are not distinguished in the table. Of the 20 towns which are not municipalities those which are cantonments are marked with a dagger (†) and the remainder are marked with an asterisk(*). The corresponding table of 1921 showed figures for 135 towns. Of these towns three (Bolpur in Birbhum district, Buxa in Jalpaiguri district and Gopalganj in Faridpur district), not being municipalities, are no longer counted as towns owing to their small population in 1921 and the subsequent abolition of Buxa cantonment and three (Maniktola, Cossipore-Chitpore and Garden Reach in the 24-Parganas) have since been included within the Calcutta municipal area. Figures are shown for eleven new census towns Burnpur (Burdwan), Contai (Midnapore), Dum-Dum (24-Parganas), Feni (Noakhali), Gauripur (Mymensingh), Kalimpong (Darjeeling), Kulti (Burdwan), Lalmonirhat (Rangpur), Naugaon (Rajshahi), Ondal (Burdwan), and Siliguri (Darjeeling) of which Dum-Dum (24-Parganas) and Gauripur (Mymensingh) are municipalities. In addition cantonments (now only three in number viz., Barrackpore, Jalapahar and Lebong) are shown as separate towns and not as being included in the adjacent municipalities. For comparison with the figures in previous reports the cantonment figures should be added to those shown in this table for the adjacent municipalities and figures for Dum-Dum, now a municipality, to those for North Dum-Dum.

3. Figures for coolie encampments shown in column 22 of imperial table III are included in this table in the figures for the proximate town.

4. The following table shows the distribution of the military and civil population within the three cantonments :—

Name of Cantonment.	Population.					
	Military.			Civil.		
	Both sexes.	Males.	Females.	Both sexes.	Males.	Females.
1	2	3	4	5	6	7
Barrackpore	2,061	1,678	383	8,821	5,324	3,597
Jalapahar	155	87	68	863	334	229
Lebong	127	95	32	437	257	180

The military figures are those obtained from the census of the strictly military area (including officers' lines) and it is possible that the figures for civil population consequently contain a certain number who should properly be reckoned as military. *Per contra* the military figures probably include not only the families of military officers and other ranks but also such persons as the inhabitants of the servants' lines in military quarters who are in some cases civilians. In addition to the figures given above the following figures are taken from the census of the areas occupied by military forces in Fort William, Ballygunge and Alipore, and are liable to the same comment as those for the cantonments :—

Area.	Population.					
	Military.			Civil.		
	Both sexes.	Males.	Females.	Both sexes.	Males	Females.
1	2	3	4	5	6	7

Ballygunge	234	198	36	..	..	..
Alipore	1,057	882	175	..	..	..

5. The figures for Hindus include the following persons returned as Brahmos :—

IMPERIAL TABLE VI.—Birthplace.

This table corresponds to imperial table XI of 1921. The necessity for public economy has, however, restricted the detail in which particulars are shown and there are in the present table no figures by district of birth either within or outside Bengal. There are also no detailed particulars for some of the smaller states.

2. The table is divided into three parts. In part A are shown figures first for the whole of Bengal (British districts and states) then separately for each district (including Calcutta) and state. Part B gives figures for cities in Bengal. Figures for Calcutta alone are not repeated in Part B but are included in the total for all cities, and are also shown totalled with the figures of suburbs in the 24-Parganas. Figures for Sikkim are given in part C.

3. In order to facilitate reference by eliminating as far as possible from the table spaces with no entries, detailed particulars are not given in the table for localities in which persons were born who were returned either in very small numbers or from few districts or cities. These details are grouped together in the table under a residuary total within the next larger area in which they fall, and will be found *in extenso* in the supplement printed after the table.

4. An alphabetical index of birthplaces shown in the table and supplement is given below. References to the table are in roman and to the supplement in *italic* type, and brackets indicate that particulars are included but not separately shown in the entry cited within them.

IMPERIAL TABLE VII.—Age, sex and marital condition by religion.

This table corresponds to imperial table VII of 1921. It is divided into four parts. Part A gives figures for all Bengal including Tripura and Cooch Behar for all the religions found by quinquennial age-groups up to 70 with additional figures for the groups 0—1, 1—2, 2—3, 3—4, and 4—5. In Part B figures are given for districts and states : for the states the age-groups are the same as for Part A, but the age-groups for districts are in decennial periods beyond 20 years and do not go further in detail than 60 years and over. Similarly only the most important religions in each district are shown separately in this part. Part C shows figures for cities for the same age-groups as are given for districts and for the principal religions only. Figures for Sikkim are given in Part D by the same age-groups as are shown in Part A. Separate figures are not given for British Territory and the aggregate of states, but they can be obtained for all religions by subtracting from the figures in Part A the sum of those given for Cooch Behar and Tripura in Part B and paragraphs 3 and 4 below.

2. Throughout this table and also in imperial table XIII the figures for Christians include the following persons of 'indefinite belief.'

IMPERIAL TABLE VIII.—Age, sex and marital condition for selected castes, tribes or races.

This table corresponds to imperial table XIV of 1921. Figures for Maghs are not given on the present occasion because returns of that name include persons of very different descent and habits. Three additional groups are shown viz., Kayasthas (in order that the three "upper classes" of Hindus may be fully represented), Namasudras (in order that figures illustrating the "depressed classes" may be more representative) and Jolahas (in order that comparison may be made both with Muslims in general and also with the Sayyads for whom particulars are given now as in 1921). For the reasons resulting in the choice of other groups the reader is referred to the title page of the imperial table XIV of 1921. An innovation which has made the table both more detailed and more extensive is the inclusion of separate figures for persons of the same tribe professing different religions.

2. In a supplement printed after the table the figures shown for Indian Christians are further analysed according to their racial, tribal or provincial affiliations. They include some groups (e.g., Ceylonese) which are not Indian and others (e.g., Naipali, Newar, etc.) which may not be entirely Indian by race.

3. The figures in column 4 do not in all cases agree with those for the same group in imperial table XVII. This is because the figures in table XVII include doubtful entries subsequently added on classification to the name shown, whereas the present table, like imperial tables XI and XIV, does not include these subsequent additions.

4. Ages in this table and supplement are given to the nearest birthday.

IMPERIAL TABLE IX.—Census Infirmities.

This table corresponds to imperial table XII of 1921. It shows the numbers returned as suffering from insanity, deaf-mutism, total blindness or "corrosive" leprosy. The table is divided into two parts. In part I the distribution is given by age and sex. In part II the distribution is by locality (division, district, city or state) and sex.

2. In each part of the table the entry under "Total Afflicted" is not always equal to the sum of corresponding entries under each affliction. This is because persons returned as suffering from more than one affliction are shown under each. In the supplement printed after the table the numbers of persons thus entered more than once are shown by sexes both according to age (part I) and according to locality (part II). The figures by age and sex of persons in Bengal States suffering from more than one infirmity can be obtained from part I of the supplement by deducting the numbers in British Territory from those in Bengal, British Territory and States. They are also reproduced below : –

No persons were returned from Sikkim as suffering from more than one infirmity.

3. As a measure of economy no figures have been compiled corresponding to those given in imperial table XII (A) of 1921.

IMPERIAL TABLE X.—Occupation or means of livelihood.

This table corresponds (with modifications) to imperial table XVII of 1921. Particulars given in 1921 of the dependents of workers in each occupation have not been collected but persons shown as "workers" in 1921 have been shown separately as "earners" and "working dependents." Tables were designed to show subsidiary occupations of earners with agricultural occupations and also for certain mixed occupations to give the numbers returning each occupation as principal or subsidiary means of livelihood; these tables would have furnished particulars to some extent comparable with details (not now given but given in 1921) showing those workers in each occupation who have some form of agricultural occupation as a subsidiary means of livelihood, but public economy has made it impossible to prepare them. In place of these details, however, the present table shows also the numbers of earners following each occupation as a subsidiary means of livelihood to some other.

2. The table is divided into two parts. In part i are given for British Territory, States and Cities the total figures of those following each occupation as earners (principal or subsidiary occupation) and working dependents. In part ii similar details for divisions, districts, cities and states are so presented as to show not only the distribution by locality of the total population following each occupation but also the occupational distribution of the population in each locality shown. The inclusion of figures for cities is an innovation intended to increase the usefulness of the table: they are shown in italics below figures for the districts with which they are included.

3. The scheme by which occupations have been classified comprises four main classes, divided into twelve sub-classes, fifty-five orders, and one hundred and ninety-five groups. Figures have also been given for three subsidiary groups forming part of the groups shown as No. 41, No. 102 and No. 117: these are No. *41A.*—*Jute pressing*, No. *102A.*—*Persons concerned with inland water transport*; and No. *117A.*—*Trade in jute textiles.* The main classes and sub-classes are the same as in 1921. Orders Nos. 3, 4 and 5 of 1921 (Mines; Quarries of hard rocks; and Salt, etc.) have been re-constituted as two, viz., 3. Metallic minerals; and 4. Non-metallic minerals, this results in a reduction of the number of orders by one and consequent changes of numeration. Many groups have been combined, for instance under the order 14.—Building industries, and others have been re-arranged or sub-divided, particularly in sub-classes I and II dealing with the exploitation of animals, vegetation and minerals. The group now appearing as No. 183 (persons connected with places of public entertainment) under the order "Letters, arts and sciences" was classed in 1921 as No. 101 under the order "Other miscellaneous and undefined industries"; whilst witches and wizards, shown in 1921 with beggars and vagrants now find themselves in group No. 181 in the company of horoscope casters, astrologers, fortune-tellers and mediums; but with these exceptions the changes in the allocation of groups amongst orders are few and of minor importance. The list below gives in detail the corresponding groups in the tables of 1921 and 1931:

4. In both parts of the table the persons shown as working dependents under group No. 192 are convicted prisoners not undergoing rigorous imprisonment. Other inmates of jails, asylums and almshouses are shown as "earners principal occupation" in this group and their numbers are similarly shown in the totals of the order, sub-class and class in which they fall as well as in columns 4-5, 11-12 and 18-19 of part i opposite "All occupations"; but in the statements at the head of each group of columns in part i they are excluded from the total number of earners and included in the total of non-working dependents, and similarly they are excluded from columns 3 and 4 and included in columns 7 and 8 of part ii.

5. In part ii of the table figures for a group forming the only composite part of an order (e.g., group 145) or an order forming the only composite part of a sub-class (e.g., order 50) are not shown separately from those for the wider classification. As a further economy and for facility of reference details of groups returned in less than 10 districts, cities or states are not shown in the table but in a supplement printed after part ii. The groups shown in the supplement are Nos. 8, 9, 10, 11, 12, 14, 20, 22, 24, 25, 26, 29, 33, 34, 36, 38, 39, 40, 41, 48, 52, 58, 62, 69, 77, 79, 80, 110, 120, 140, 160 and 180, and the orders under which they fall are distinguished in the table with an asterisk. There were no returns under groups 30, 31, 32 and 37 and these are not shown at all in part ii.

IMPERIAL TABLE XI.—Occupations of selected castes, tribes or races by sexes.

This table corresponds to imperial table XXI of 1921 and shows the distribution amongst certain broad occupational sub-classes of the earners of selected groups. Figures are shown first for those following the traditional occupation of the group (if any) and subsequently for those with other means of livelihood. The numbers following the traditional occupation are not repeated in the appropriate column of the distribution by sub-classes : for instance Khambus are shown as cultivators and those returned as cultivators appear in columns 8 and 9 but not again in columns 18 and 19. Where a sub-class comprises more occupations than that traditional to a group the figures under it similarly exclude those shown in columns 8 and 9 as following the traditional occupation : thus the traditional occupation of Baidyas is given as physicians and persons so returned are shown in columns 8 and 9 ; the returns for this caste under columns 52 and 53 include only those who follow other professions than medicine given in the heading to these columns, viz., persons whose profession is the law or teaching.

2. The table contains some additional information not given in 1921. The classification then made into workers and dependents has been extended to show "earners", "working dependents" and "non-working dependents". Figures are also given of the number of working dependents as well as earners following the traditional occupation of their group. As in 1921 the religion of groups chosen is given but subsidiary figures are also given for Khambus and Lepchas professing Hinduism, Buddhism and Tribal Religions. Some of the groups shown in 1921 have been omitted and others added : for the reasons leading to the choice of those common to both years the reader is referred to the title page to imperial table XXI of 1921. Bhuinmalis are not now shown, but figures are given for the much larger groups of Doms and Haris who are of the same social status and occupation. Figures are not given for Tiyars, but Jalia-Kaibarttas who are also boatmen and fishermen are included because their numbers are greater and they offer interesting comparisons with the Mahishyas, considered once to be of the same caste but now entirely different. Mangars are omitted as being of Nepalese origin and because the returns are probably to some extent inaccurate : the same degree of inaccuracy is not expected to affect the returns of Khambus who are also of Nepalese origin and have been retained. No figures are given for Maghs for the reasons given in the title page to imperial table XIV. The inclusion of Kayasthas makes the figures for the "upper classes" of Hindu society complete and the addition of Muchis and Namasudras taken with the substitution for Bhuinmalis and Tiyars of the more extensive groups of Doms, Haris and Jalia-Kaibarttas makes the selection of "depressed classes" more representative. The Mahishyas are shown on account of their numbers, importance and social aspirations and for comparison with the Jalia-Kaibarttas. The inclusion of Jolahas makes possible comparisons between two social classes of Muslims in the absence of any details similar to those in imperial table XX of 1921 showing the distribution by religion of workers and dependents amongst the occupational groups. Finally Indian Christians have been included. Detailed comparisons of occupation and literacy are rendered possible by the inclusion in imperial table XIV of all the groups shown in this table with the exception of Muchis, Armenians and Europeans.

3. Figures in columns 3-7 do not in all cases add up to the total numbers of the caste given in imperial table XVII. This is because the figures in table XVII include doubtful entries subsequently added on classification to the name shown, whereas the present table, like imperial tables VIII and XIV, does not include such subsequent additions.

IMPERIAL TABLE XIII.—Literacy by religion, age and sex.

This table corresponds to imperial table VIII of 1921. It shows by sexes figures for those literate (able to write a letter to a friend and to read the reply), illiterate and literate in English. Details are given by age-groups for all religions found in the case of Bengal and British Territory in Bengal and for the principal religions in each district, city or state. The table is divided into four parts. Part A gives details for Bengal (British districts and states) and for Bengal (British Territory). In part B figures are given for each district (including Calcutta) and state in Bengal. Figures for cities are given in part C: those for Calcutta alone are not here repeated but they are included in an aggregate for Calcutta and the suburbs of Calcutta in the 24-Parganas. Part D gives figures for Sikkim. In all parts of the table quinary age-groups are shown up to 20 followed by one group for 20 and over, and returns claiming literacy for children less than 5 years old have been included amongst the illiterate.

2. The details for Christians in the table include figures for 81 persons (male 71, female 10) who returned indefinite beliefs as their religion. Particulars of their distribution are given in the title page to imperial table VII.

3. A supplement printed after the table shows details by age-groups of those persons in each sex who have reached at least the upper primary standard of education. For Bengal (British Territory) and for each division details are given for every religion returned. For districts and states the details are confined to the principal religions locally professed. The age-groups shown are 7-13, 14-16, 17-23 and 24 and over.

IMPERIAL TABLE XIV.—Literacy of selected castes, tribes, races and social groups by locality and sex.

This table, corresponding to imperial table IX of 1921, gives for selected groups figures for Bengal (including states) and Sikkim similar to those in imperial table XIII. The necessity of public economy has reduced the number of groups shown in the table from 89 to 41, but it has been attempted to make the table within this restriction as representative as possible. For comparison with each other and with the figures given for Muslims in imperial table XIII, particulars are here given of two Muslim social groups, Jolahas and Sayyads. The figures for Anglo-Indians and Indian Christians render possible comparisons with other communities, after eliminating the distortion introduced by the inclusion of Europeans and others in the figures of Christians given in table XIII. The table also contains figures for groups constituting the "upper classes" of Hindu society (Brahmans, Baidyas and Kayasthas) and representing the "depressed classes" (Bagdis, Bauris, Chamars, Dhobis, Doms, Haris, Jaliya-Kaibarttas, Kalus, Namasudras and Sunris), aboriginals and hill tribes (Chakmas, Garos, Lepchas, Mrus, Mundas, Oraons, Santals and Tiparas), the trading classes (Agarwalas and Shahas), artizans and functional groups (Kamars, Kumhars, Jogis and Napits), typical cultivators of West Bengal (Mahishyas), an immigrant caste of Nepal (Khambus—chosen because it was hoped that returns for this caste would be less inaccurate than those for such groups as Khas, Mangars, etc.) and a sectarian caste (Baishnab). Separate figures are given for members of aboriginal or hill tribes professing different religions. Figures for Kalus are included in imperial table XVII with those for Telis but are here given separately for comparison with former years.

2. Of the groups shown, Agarwalas mainly reside in Calcutta. Bagdis, though found throughout the whole of Bengal, are most numerous in the Burdwan and Rajshahi Divisions. Mundas, Oraons and Santals are principally found in West, Central and North Bengal. Chakmas and Mrus are practically confined to Chittagong and the Chittagong Hill Tracts, Garos to Mymensingh, Khambus and Lepchas to Darjeeling and Sikkim and Tiparas to the Chittagong Hill Tracts and Tripura State. Anglo-Indians are rarely found outside Calcutta and other towns. Other groups are dispersed in considerable numbers throughout all parts of the province. More detailed particulars of local distribution are given in imperial table XVII.

3. The statement below shows by sexes for 21 of the groups given in the table, the total population aged 7 and over. For these groups the total figures of literates in the table exclude those so returned who are under 7 years of age.

4. For the remaining 20 groups shown in the table but not included in paragraph 3, the figures of literates in the table include in addition to those aged 7 and over also those aged 4—6 years except in the districts of Rajshahi, Dinajpur, Jalpaiguri, Rangpur, Bogra and Pabna, the Siliguri subdivision of Darjeeling and Cooch Behar State. For comparison with the figures given in the statement above, a supplement printed below the table shows for these 20 groups the total population and literates aged 7 years and over in the districts just mentioned.

5. A further analysis of Indian Christians by age-group and sex is given in the report volume, where they are further divided according to their racial, tribal or provincial affiliations.

6. The total population given for the groups in the table differs in some instances from that shown in imperial table XVII. The reason for this is that the figures in imperial table XVII include a number of doubtful returns classified after the preparation of this table had been undertaken.

IMPERIAL TABLE XV.

Part I.—Mother tongue by locality and sex.

This table corresponds to Imperial table X of 1921 with some rearrangement of the details shown. The languages returned are now given in column 1 and in successive columns thereafter is given the distribution by locality and sex of those speaking them, viz., in part A figures for all Bengal and each district (including Calcutta) and state, in part B figures for all cities and each city, and in part C figures for Sikkim. The languages are given virtually in the same order as in 1921, viz., first the languages of Bengal, Nepal and Sikkim (A); then in succession the languages of the neighbouring provinces, Assam (B), Bihar and Orissa (C) and Burma (D); then languages of other parts of India (E), and of other Asiatic countries (F); and finally European languages (G). Bengali and Hindustani occur first in their group: other languages are generally shown in alphabetical order within the group in which they fall. Figures of Indian languages classified according to a scheme based on that used in the Linguistic Survey of India are given in part I of the report.

2. During compilation of the figures a number of dialects have been combined under the main language name. These are shown with their figures in italics in the table itself. The figures for Hindi, shown as a dialect of Hindustani, include all returns for sub-dialects of western Hindi. A number of alternative names as well as incorrect, inadequate and doubtful returns were also classified and are shown with the language to which they were allotted. The languages thus affected are given in the statement below: dialects are shown in small bold letters and languages only shown separately in supplement No. II (*see* below, paragraph 3) are distinguished with an asterisk; references to the table are in ordinary and to the supplement in *italic* type.

A detailed distribution by locality of the returns thus classified is given in Supplement No. I printed after this part of the table.

3. In the interests of public economy and for convenience of reference language returns either in very few localities or by very few persons have been generally included together within the group in which they fall. The detailed composition of such combined entries and the distribution by locality and sex of those speaking the languages included in them are shown in Supplement No. II printed after this part of the table.

4. An alphabetical index of the language names returned is given below. References to the table are in roman and to Supplement No. II in *italic* type. Brackets indicate that figures for the entry are included but not shown separately in the reference given within them. To those entries marked with an asterisk there are references also in the statement in paragraph 2 *above*, and in Supplement No. I.

IMPERIAL TABLE XV.

Part ii.—Bi-lingualism.

This part of the table is an innovation of the present census. It is divided into two parts. In part A are shown amongst those speaking as mother tongue one of the languages of India, Nepal, Sikkim and Burma, the numbers speaking also some other one of these languages or Arabic. The distribution is by locality and sex and figures are also given for those speaking no subsidiary languages as well as for those speaking any. The totals given for those speaking any subsidiary language do not in every case agree with the sum of the separate entries following them for each subsidiary language. This is due to two causes, first the omission from the table of details for persons returned as speaking other subsidiary languages than those shown and secondly the fact that persons speaking more than one subsidiary language appears under both or all. This part of the table shows the main subsidiary languages used with each of the selected mother tongues, and the total number speaking that mother tongue who are bi- or multi-lingual.

2. Part B shows for each tongue used as a subsidiary language the mother tongue of those using it. The distribution here also is by locality and sex and under each subsidiary language spoken details are given of those speaking other mother tongues also besides those shown in part A. Part B of the table therefore is the complement of part A. It shows the total extent to which each selected tongue is used as a subsidiary language and makes it possible to ascertain at once the extent to which any language chosen is spoken in ordinary life by adding to those who speak it as their mother tongue (shown in part i of the table) the total numbers here shown who use it as a subsidiary language.

IMPERIAL TABLE XV, part ii.—Bi-lingualism. A : Persons speaking specified mother tongues according to subsidiary language also spoken by locality and sex.

NOTE.—Serial numbers in ordinary type refer to part i of the table : those in italics refer to Supplement II to part i.

5. Details of the returns included in columns 65 to 67 under "Indefinite Beliefs and Religion not returned" are given in Supplement No. I, Part C, printed after the table. All the persons returning themselves as agnostics, atheists, deists, freethinkers, sceptics and theosophists are of European and allied races except 2 male atheists and 2 male theosophists in Birbhum who are Indians.

6. In the interests of public economy no table has been prepared corresponding to imperial table XV of 1921. Christian sects there shown, however, are shown in this table in four groups—(1) Roman Catholic ; (2) Romo-Syrian ; (3) Other Syrian ; and (4) Others, and the racial distribution given in 1921 is shown for these four groups partly in Supplement No. II, printed after Supplement No. I, and partly in a statement below. The supplement shows the European and allied races, Anglo-Indians and Indians of the two most numerous sects, viz., Nos. (1) and (4) above, and accounts for all Christians except 1,154. Of the 1,154 persons not there accounted for 614 are persons of other races, professing the sects dealt with in Supplement No. II and 540 are Syrians. Their distribution by race and sex is given below :—

IMPERIAL TABLE XVII.—Caste, tribe, race, nationality or Muslim social group.

This table corresponds to imperial table XIII of 1921, but for reasons of public economy there has been some modification of the principle on which groups shown have been chosen. Amongst Muslims only 3 groups are enumerated : these are (*a*) 'Mumin' (Jolahas), some of the leading men amongst whom desired that separate figures should be presented for their group ; (*b*) Sayyads ; and (*c*) Others : figures for these groups are to be sought as subsidiary details to the total of Muslims given as group No. 105 in the table. Other groups than Muslims are mainly Hindu castes. In 1921 details were given for all castes having or approaching 1 per mille of the population and further details were given in an appendix to the table for groups only found in certain parts of the province. On the present occasion sorting for Hindus was confined to those groups forming 4 per mille of the population in 1921 unless they were of the 'depressed classes' or were included for some other particular reasons, e.g., the Rajputs and Malis added at the direction of the Census Commissioner. Hill tribes and groups of aboriginal derivation, whether completely or partly or not at all hinduised were also included and appear in the table. The restricted sort for this table results in the omission of particulars for the following groups shown either in the table or in its appendix in 1921. Muslim groups are distinguished with an asterisk.

Shown in the table in 1921.

2. An innovation is the presentation of figures for those who gave no return of caste : these figures include not only outcastes and some prostitutes but also a number who repudiate the caste system or declined to return their caste upon conviction or for some other reason. For tribes professing more than one religion subsidiary figures are given for each religion returned. In addition to the name chosen to give groups their alphabetical position, other caste names are also given in brackets in some cases. All persons returned under any of these designations are included in the figures of the group although some of the names are now coinages current nowhere outside the caste claiming them whilst others (e.g., Chandal) have probably fallen out of use entirely and were retained only to ensure that such returns if made might not be overlooked. Figures for sub-castes returned by Brahmans are given in a supplement after the table.

3. In the result the table shows figures for 48,958,198 persons in Bengal and 108,548 persons in Sikkim out of a total population of 51,087,338 and 109,808, respectively. The composition of the numbers not included in this table or the statement in paragraph 1 above is given summarily below by religion and (so far as is shown in other tables) by race :

The first nine groups do not come under caste divisions at all and in the case of Jains, Sikhs, Jews, Zoroastrians, Anglo-Indians, Indian Christians and Indians of indefinite beliefs the race can be deduced from the description. Similarly most persons returned as 'Confucians' may be reasonably assumed to be Chinese as well as those specifically so returned. For Europeans and allied races details are shown by British nationality in imperial table XIX. Table XIX also gives the detailed distribution of Anglo-Indians which can moreover be found in the title page and supplement No. II to imperial table XVI. The detailed distribution by districts of Jains, Sikhs, Jews, Zoroastrians, Chinese (both those so returned and also Confucians), Indian Christians, Christians of 'Other races' and Indians of indefinite beliefs can also be found in imperial table XVI or its supplements and title page. An analysis of all Indian Christians by racial, tribal or provincial affiliation is given for the total number in Bengal and Sikkim in the supplement to imperial table VIII and a subsidiary table to Chapter IX of the report. The only groups therefore in the above list for which no figures whatever are recorded by race, caste or tribe are Nos. 10-13. These form a total of 1,832,456 in Bengal and 625 in Sikkim or less than 359 and 57, respectively, in each 10,000 of the total population.

IMPERIAL TABLE XVIII.—Variations in population of selected tribes.

No table corresponding to this was compiled at the last census. It was designed to show variations in the population of primitive tribes at successive enumerations from 1881. The intention was to give figures by sexes of all the hill tribes found in north and in south-east Bengal, as well as of all groups of aboriginal derivation and to show also the distribution of each tribe by religion. In carrying out this intention, however, several difficulties were encountered. A list of tribes was compiled which was intended to include all those falling within the description above, but although figures proved to be on record for all but one tribe in 1901 and 1911 as well as at the present census, no figures were forthcoming for many tribes in 1891 or 1921 or both these years, whilst no method could be devised of deducing for any but one group the figures of 1881 for the area now constituting the province. The figures on record for 1921 were in most cases not for the whole of Bengal and Sikkim but for those areas only in which a tribe is chiefly found, whereas in other years the total strength of the tribe was shown. For 1911 it transpired that there was no record of the distribution by sexes of certain tribes. A threefold difficulty also arose in obtaining figures for 1891 : no distribution by religion was then recorded for the primitive tribes; there was no such division as has since been made amongst those classed as Bhotias ; and the figures by sexes could not be accurately extracted for any tribe recorded in Sikkim where "the inhabitants were numbered in the three simple categories of men, women and children, the sex of the latter not being ascertained"

2. In these circumstances no figures are given for 1881. For 1891 there is no distribution by religion and in the case of some Himalayan or sub-Himalayan tribes found in Sikkim the figures for males and females fall short of the total given for both sexes. In order to give for all years figures which refer to the same areas and therefore justify calculations of variation, as well as to show also statistics where they are available of the total strength of the tribe, the table has been divided into two parts. In part A details are given for all the years 1891-1931 for such tribes as were recorded in 1921 and for those areas only to which the figures of 1921 refer. In part B details for all Bengal and Sikkim are shown for 1891, 1901, 1911 and 1931 both for the tribes included in part A for which figures there given refer only to selected areas and also for some other tribes not shown in the report of 1921. Finally some groups, which could not be conveniently included in part B and for which complete figures are not on record for 1891, have been shown in the statement below which gives such figures as there are for all Bengal and Sikkim for 1901, 1911 and 1931.

IMPERIAL TABLE XIX.—Europeans and allied races and Anglo-Indians by age and sex.

This table corresponds to imperial table XVI of 1921. It shows figures in part A for Europeans and allied races (e.g., Americans, South Africans, etc.) distinguishing (1) British subjects from (2) Others and in part B for Anglo-Indians. All Europeans and persons of allied races whose birthplace is Great Britain or a British Colony or Dependency are included amongst the British subjects unless the contrary was expressly stated in the returns. Figures for cities shown in a separate part of the table in 1921 are now shown in italics below the districts in the figures for which they are included.

2. There is again a difference in the age-groups shown for Europeans and Anglo Indians. Particulars for Anglo-Indians are given in greater detail for the years of childhood, youth and old age. Comparisons for ages 0-13, 14-16 and 16 and over can be made by simple summation of the constituent groups given in the table. An additional rough comparison with the age-groups 17-19 and 20 and over given for Anglo Indians can be made for Europeans by treating three-sevenths the group 17-23 as aged 17-19 and the sum of the remaining half and all higher groups as 20 and over. Formulæ are given below by which the age-groups of 1931 can be reduced approximately to those of 1921: but they are given with the caution that the numbers at any age in this table are comparatively so few and the ages returned are relatively so precise that the figures obtained by the use of the formulæ are unlikely to have any great accuracy; whilst so many European children are sent to Europe at ages up to 16 that it is impossible to regard a proportional distribution of the groups comprising the total 0-16 as indicating the numbers genuinely ascribable to any particular year within it. The further precaution should be observed that, as the present figures have been taken to the nearest birthday, the average age of persons included in any group is six months younger than in the corresponding group of 1921, in which the age returns were made to the last birthday.

3. In the interests of public economy no separate figures have been compiled for Armenians. There are also no details of the nationality of persons of European and allied races.

IMPERIAL TABLE XX.—Summary figures for districts.

No table corresponding to this was published for Bengal in 1921. It resumes in a summary form information given at length elsewhere. For divisions, districts, cities and states as now constituted it gives from imperial tables I and II figures of area with population and density in 1921 and 1931 and variations from 1911 to 1921 and from 1921 to 1931. It also gives a summary distribution by religion. For the sects included within the religious groups here given and for the religions not separately shown details are given in imperial table XVI with its supplement and title page.

Details for smaller areas than are shown in this table are given in provincial tables I and II.

PROVINCIAL TABLE I.—Area of police-stations showing also towns, inhabited rural mauzas and occupied houses and population, 1921-31, with variations, 1911-1931, and density, 1931.

This table corresponding to provincial table I of 1921 shows for subdivisions, police-stations and census towns, part of the information given in imperial tables I and II. The inclusion of census towns is an innovation intended to make the table more self-contained and useful.

2. The figures of area adopted for police-stations are those furnished by the Government of Bengal and used in estimating the area of districts for the purposes of imperial table I: they exclude large rivers and arms of the sea falling within or forming the boundaries of administrative units; and from the areas of police-stations and subdivisions, but not of districts, parts of reserved forests and of the Sundarbans have been excluded. Full details of the source of the figures adopted for the area of Calcutta and the wards of Calcutta municipality are given in the title page to imperial table I in the report on the census of Calcutta forming volume VI of this series. No comprehensive explanation is forthcoming of the variations in the figures of the area of police-stations. Changes of jurisdiction, alluvion and diluvion and more accurate estimates of area based on fresh surveys or settlement operations may be taken as having contributed to the difference.

3. In each case for years previous to the present census the population taken is that for administrative units as now constituted, and the figures adopted for 1911 and 1921 consequently differ in some instances from those recorded in the reports on the census of those years. Where areas are now *de facto* administered under a different police-station from that in which they were included in 1921 the population ascertained at the census of 1911 and 1921 and kept on record in the census mauza tables at district headquarters has been transferred to the police-station under which the mauza is now found to fall. In some cases, no government notification appears to have been gazetted to account for these changes of jurisdiction, but the supplement printed after the table shows the adjustments of population made and such details of the notifications gazetted as have been traced.

*In 1921 the Sundarban Forest area was included in Sandeshkhali thana.

†Excluding the water areas (11 sq. miles) of Fort and Canals.

‡Area in acres and number of persons per acre.

§In the port and canals each occupied vessel was treated as a house.

‖Including the water area the density becomes 27,198 per sq. mile.

**Figures of population exclude those of the military areas of Ballygunge and Alipore shown with Fort William and Maidan (details are given in the title page to Imperial table V, *ante*, and in Imperial tables I and II of Volume VI, part ii).

PROVINCIAL TABLE II.—Population of thanas, etc., by religion, sex and literacy.

This table corresponds to provincial table II of 1921. The figures for total population, however, do not appear in the present table and are to be obtained from provincial table I. On the other hand figures by sexes have been given so far as available for literates of each religion shown and the total numbers literate in any language have been shown under three agegroups. The ages are shown to the nearest birthday.

2. As in 1921 the table shows figures for each division, district, subdivision, revenue thana (with the reservation noted in paragraph 5 below) and the area under the jurisdiction of each police-station. An innovation has been made in the addition of figures for each municipality and census town which are shown (where the area is itself is not a police-station) in italics within the police-station in which these places geographically fall or principally fall. Footnotes given in provincial table I but not here repeated indicate the approximate distribution of the population where a census town falls within the geographical area covered by more than one police-station.

3. Figures for literates given against the name of districts and larger areas include persons of all religions. Figures of literates given for the smaller areas comprising districts do not add up to the district totals owing to the exclusion from them of details for literates of the religions shown below which were not separately extracted from the census schedules.

Name of district.	Name of religion for which figures of literates are not available in subdivisions and smaller areas comprising the district shown.	Name of district.	Name of religion for which figures of literates are not available in subdivisions and smaller areas comprising the district shown.

population according to different demographic criteria, caste and communities, health, education, employment and migration and landholding and tenancy.

Census reports have, as a rule, been used by demographers, economists and economic historians, and a great deal of this use has been limited to the statistical data contained in them Sociologists, social historians and political scientists have made very little use of these reports. These reports provide, particularly in the volumes entitled 'General Reports' which were published separately for each state as well as for India as a whole, ethnographic information on castes and tribes, describing their internal organization, social changes taking place in them, and the emerging problems of interaction among the different castes and communities. Social movements and trends towards social mobility among the castes and communities are also often discussed. Even from the viewpoint of the sociologists and social historians, therefore, the census reports are invaluable sources of information and can provide useful materials on how the different sections of Indian society were responding to the processes set in motion by British rule.

The census reports are today a body of rare documents available in only a few select libraries and even these libraries do not always have all the available volumes which in an average census year extended to more than a hundred for the whole of India. This reprint of Part II Tables of Census of India 1931 for Bengal and Sikkim is published in the hope that it will be welcomed by individual researchers as well as libraries.
